

Paintable Mould Release 527

A proven release agent to prevent sticking in mould cavities

Australian Made

Technical Description:

The product is a non-silicone, premium quality mould release agent to prevent sticking in mould cavities.

It has been formulated to provide excellent release characteristics on a wide range of thermoplastics and rubbers, which enables plastic parts to be painted, printed, hot stamped, vacuum plated and metalised.

Suitable for ABS resins, nylon, polyester, melamine, acrylics, polystyrene, rubber & celluloses.

Properties:

Flashpoint:	Not applicable in sealed aerosol
Operation Temperature:	Operational up to 150°C
Appearance:	Clear colourless liquid
Odour:	Characteristic hydrocarbon
Solubility:	Soluble in solvents. Insoluble in water.
Flammability:	Extremely flammable.
Composition Data:	CFP1000 Paintable fluid, isohexane, LPG SG 0.59

Application:

Shake well before use. When unfamiliar with the application of this product, testing is highly recommended.
 Hold approx. 25cm from surface, spray a light but even film over the area to be treated. Remove any excess lubricant with a cloth.
