PRO 901 EP POLYMER PASTE

Pro 901 EP Polymer Paste is a Full Synthetic Calcium Sulphonate based assembly/lubricating paste & anti seize blended with P.T.F.E (Polytetrafluoroethylene). Pro 901 EP Polymer Paste contains the very latest Enhanced Polymer Technology (E.P.T) providing very high performance characteristics such as exceptional Extreme Pressure (E.P) properties, high salt water resistance, high operating temperatures with high residual lubrication and will not dry out.

Pro 901 EP Polymer Paste provides Exceptional Film strength and superior adhesion. The Long term residual lubrication of 901 EP Polymer Paste ensure moving parts are provided with an almost permanent high load type film of lubricant able to tolerate high and low temperatures and moisture contamination.

Common Applications

- Tool and Die assembly
- Injection mould tool lubricant
- Engine and Head Assembly
- Marine/fishing assembly and lubrication
- Small gear assemblies
- Linear rails
- Any application where moving parts require extreme protection and lubrication.

**THIS PRODUCT IS AVAILABLE IN 20KG TUBS,
500ML TUBS & 250G TUBES.**
