

Hales Bolt on Ball Bearing Pin and Bush Assemblies

Helical design of cage and plunger allows cage to freely rotate over the entire peripheral surface. Perfect precision alignment. When assembling, two dowel pins are to be fitted in guide bush and holder.

Please note: Dowels and screws are included in assembly.

Materials:

Guide post - Deep core strength case hardened materials

Holder - Automotive high alloyed iron

Guide bush - Automotive high alloyed iron with solid lubricant.

M: Movable range of stopper

Please note: 60 Dia has fixed stopper
